

Subject: FW: 5th overall Incident Specific Convene of RRT Trustees via
Tele-Conference Scheduled 5:00pm Today Wednesday 5 MAY 2010
Importance: High

All:

Your participation is requested on behalf of FOSC for the Region VI Trustee Agencies and Dispersant SCO for Louisiana STATE (Ms. Karolien Debusschere) for an Incident Specific convening of the Consensus Trustee Agencies to discuss ongoing issues associated with the efficacy of results of the Sub-Sea Dispersant Injection Test, and evaluation of monitoring indications to date.

Trustee concerns, and plans to move forward while satisfying trustee concerns.

Date: Wednesday 5 MAY 2010

Time: 5:00pm Local Central Time

Dial In Number and PIN:

866-299-3188 NUMBER

214-665-2292 PASS CODE

Note: Dr. Steve Spencer has indicated his on ground time at NOLA Int'l to be 1430L. If he cannot make the call by 1700L, he indicated that the agencies (MMS, NPS,

USF&WL) be polled for any consensus issues individually.

Although EPA has requested the following topics to be included on this call, the main focus of this call is the sub-sea dispersants discussion.

Note: The following topics EPA submitted for discussion will most likely have to be deferred to another call. The results of Sub-Sea Dispersant Injection, and future plans are the focus of this tele-conference.

- * Status of determinations by USCG regarding SONS, substantial threat and worst case.
 - * Status of dispersant application (surface and sub-surface) and post dispersant application test information/results. This one is particularly important as the pre-approval requires it within 24 hrs of the dispersant application.
 - * Assessment of the sufficiency of response capabilities available to the OSC, specifically in regard to shoreline clean-up and assessment.
 - * Status of multi-regional coordination since the spill transects state boundaries.
 - * Coordination with all affected agencies regarding marsh impacts.
 - * Industrial saltwater intakes.
 - * Short term and long-term plans member agencies are implementing or planning to implement in support of response operations.
- Call and reporting schedule.
